THE LOOK AND FEEL
OF TEXTILE
WITH TOTALLY UNIQUE
PROPERTIES.

Woven from revolutionary fibres, Dickson® floor covering options combine the remarkable durability of vinyl with the aesthetic appeal and texture of traditional carpeting.

A true technical innovation developed for the most demanding public areas, such as hotels, offices, shops, restaurants, etc., Dickson® flooring is durable, comfortable, easy to maintain and attractively designed.

FLOORSCORE

Dickson® floor covering solutions are FloorScore® certified.

Good indoor air quality is essential because people spend most of their lives indoors. The air we breathe affects both our health and our well-being, from minor disturbances, such as odours, skin and eye irritations, to the development or aggravation of more serious ailments, such as respiratory allergies.

Independently tested and certified by the Resilient Floor Covering Institute (RFCI), Dickson® flooring meets the official emissions criteria for volatile organic components (VOC) and is recognized as contributing to good indoor air quality.

DIBT

Dickson® Flooring has successfully obtained Deutsches Institut für Bautechnik (DIBt) certification.

DIBt grants technical approvals as a verification of “applicability” of construction products. This certification ensures that the Dickson Flooring can be sold and is recognized to be compliant with the building laws of Germany. DIBt certification also allows customers to take advantage of Federal and State subsidies for environmentally friendly building projects.

COMFORTABLE

FLOORS PLAY A KEY ROLE IN THE COMFORT OF A ROOM

To ensure optimum convenience and well-being, our R&D team has created ultra-smart flooring solutions using advanced technology: thermal and acoustic insulation, a non-slip surface that's comfortable to walk on...

ANTISTATIC PROPERTIES

Formulated to minimize static electricity generated from walking on most carpeting, Dickson® flooring solutions provide effective protection against unpleasant shocks.

QUALITY THERMAL INSULATION

Good quality thermal insulation can dramatically improve the comfort of a room. Unlike hard flooring, Dickson® flooring offers warmth for greater well-being and energy savings.

NON-SLIP SURFACE

The woven structure of Dickson® flooring naturally prevents slipping, making it particularly appropriate for public buildings where safety standards often determine the materials decorators can use.

SOUNDGUARD®
ACOUSTIC INSULATION
by DICKSON®

EXCEPTIONAL ACOUSTIC INSULATION CAPABILITIES

A leading-edge innovation, the SoundGuard® technology was specifically designed to improve comfort and noise absorption.

Dickson developed a high performance soundproof backing that effectively absorbs ambient noise and significantly reduces the transmission of impact noise.

Acoustic comfort is truly essential to people's well-being and ideal for offices and hotels.

DURABLE

DICKSON® FLOORING WAS DESIGNED FOR HEAVY RESIDENTIAL AND COMMERCIAL USE

Woven from revolutionary vinyl fibres and combined with a high performance backing, it is extremely tough-wearing.

An innovative textile solution at the leading edge of the hottest decorating trends, perfectly adapted to the most demanding environments in terms of practicality and durability.

CLASSIFICATION FOR USE

To meet heavy use classification criteria, our flooring is subjected to standardized tests that reproduce the same tough conditions as the situations in which they are intended for. The European standard establishes a classification system based on the level of wear and requirements imposed on the areas where each type of flooring will be used.

All our collections have been approved for 33 – Heavy commercial traffic. **This is the highest classification for textile flooring.**

FIREPROOF

Dickson® flooring has excellent flame resistance. Our products have been successfully tested and certified in accordance with European (EN 13501-1) and American (ASTM E 648) fire safety standards.

WATERPROOF

Moisture is not a problem for Dickson® flooring. It is waterproof, rotproof and ultra-stable. It is perfectly suitable for wet areas.

COLOURFAST

Even when exposed to intensive sunlight, Dickson® flooring retains its gorgeous original colours.

EASY TO INSTALL

DICKSON® WOVEN FLOORING IS FAST AND SIMPLE TO INSTALL ON ANY KIND OF SURFACE

Like any other flexible flooring, installation is done by gluing the material directly to any kind of flat, clean, dry, stiff surface. To save time and increase flexibility, you can also install the tiles with a non-permanent glue.

THE FIRST WOVEN VINYL FLOORING ENSURING A CLEAN CUT.

The FrayGuard® technology developed by Dickson minimizes the common phenomenon of fraying when cutting carpeting and boosts durability of the weave. It guarantees clean-cut edges for fast, efficient, impeccable installation.

EASY TO MAINTAIN

SMART TIP

The colour of your flooring directly affects the maintenance requirements. Dirt and stains are less visible on chiné (marbled) shades than solid colours (whether light or dark). Depending on the location and the amount of traffic, this is an important aspect to consider when making your selection.

LOW MAINTENANCE

Cleaning time is minimal. As with linoleum or tiling, basic cleaning can be done with a vacuum, broom and warm water mixed with a neutral detergent.

STAIN RESISTANT

Dickson® flooring was designed to resist stains by not absorbing liquids and thus making spills quick and easy to clean.

A UNIQUE COMPOSITION FOR EXTREMELY DURABLE, EASY TO MAINTAIN FLOORING

Although the structure of the weave makes it appear to have a certain relief element, the exclusive assembly process used by Dickson guarantees it is absolutely waterproof, dustproof and stainproof. The warp and weft yarns are heat-sealed together and assembled to the backing while they're still hot to prevent the penetration of any dirt or liquids in between the fibres so it stays on the surface for easy clean-up.

Dickson® woven flooring ensures optimal quality sanitary conditions. Rotproof, antibacterial, and impervious to dust mites, mould spores and fungus, the impermeable surface makes it easy to keep clean and prevents tough to remove stains like coffee, wine, fruit jam, blood, etc.
